begin\_report

The authors addressed all the comments in a satisfactory way. Some further small remarks:

- p. 6, "errors decaying to ... 1": perhaps \*decaying\* is not the right word here
- p. 8, Eq. (33), the pinched relative entropies that appear here are defined much later, in Eqs. (81). Better give a reference
- p. 9, Eq. (40), right bracket ) is missing
